Assessor Petersen and Treasurer Flora Team-Up to Provide Convenient Service and Save Taxpayers Money During this Year's Notice of Value Mailing

Starting on February 23, 2018, the Maricopa County Assessor's Office and Treasurer's Office have partnered to provide convenience and cost savings through more eNotice options to property owners and taxpayers.

Currently, both offices provide residents with the convenience of receiving their Notice of Value or Tax Bill electronically through our eNotices service.

Providing notices electronically allows the Assessor and Treasurer to save taxpayer money that otherwise would have been used for postage. This can add up fast as the Assessor's Office will presently send out approximately 1.6 million valuation notices for tax year 2019 to the property owners of Maricopa County.

Previously residents have had to sign up for these services separately which has led to some residents only signing up for eNotices from one office. Beginning with this year's valuation notice, a new sign-up on eNotices will provide both Assessor's and Treasurer's Office notices to residents unless they opt-out of one of our services.

We're proud to provide common sense solutions that save taxpayers time and money and look forward to future innovations as we improve the quality of life for the fastest growing county in America.

How to sign up: If you are already signed up for eNotices from either office, no action is required on your part. If you are a new subscriber and wish to sign up, please visit either the [Maricopa County Assessor's Office website](#) or the [Maricopa County Treasurer's Office website](#) to receive eNotices from both offices.
